

CPP20521 : CERTIFICATE II IN FIRE PROTECTION INSPECTION AND TESTING

BUILD YOUR OWN COURSE

This course allows participants to tailor training to align with their job role, skills needs or to meet a particular licensing or accreditation outcome. The course is delivered in the workplace with support from industry experts

Who's it for?

This course is for routine service technicians employed in the fire protection industry who are looking to top up and validate existing skills and knowledge or learn new skills to gain a promotion and enhance career opportunities.

Are there any special requirements needed to take this course?

- Participants must be employed in the fire industry or be capable of conducting routine service of specific fire protection equipment under supervision in the workplace.
- Participants require access to a personal computer or tablet and have basic computer skills to enable use of the on-line learning system.

What if I already have experience?

- Our Recognition of Prior Learning (RPL) Pathway is designed for individuals who have acquired skills and knowledge working in the fire industry or via other learning.
- The RPL pathway is designed to recognise existing skills and knowledge without having to undertake formal training.
- Participants can undertake this course via an RPL pathway.
- Eligibility for the RPL pathway is determined on a case by case basis, centred around an individual's experience and availability of evidence to demonstrate competency.
- For more details on the RPL pathway visit www.fia.edu.au/rpl.

What does the course cover?

The course provides participants with the foundation skills and knowledge to perform routine service work in the fire protection industry and covers:

- Understanding key Australian standards, regulations and codes related to routine servicing of fire protection systems and equipment
- Maintaining workplace health and safety
- Ability to organise work schedules and complete tasks safely and efficiently in line with industry standards
- Providing effective customer service
- Ability to discuss servicing needs with clients for a range of fire protection systems and equipment

- Introduction to the classification of fires and extinguishing techniques
- The use of tools and equipment to install and service fire protection equipment and the maintenance of service vehicles

Participants are also required to select six units from the predefined list below to meet their specific needs. If more than six units are required, the extra units will form a separate enrolment and additional fees will apply.

Unsure which units to select? Complete the course enquiry form on our website and one of our friendly team will help build a course specific to your needs. Visit www.fia.edu.au/advice for more information.

Unit Selection List

Unit Code	Description
CPPFES2003	Safely move loads and dangerous goods
CPPFES2010	Inspect and test fire hose reels
CPPFES2011	Install portable fire extinguishers, fire cabinets and fire blankets
CPPFES2016	Inspect, test and maintain delivery layflat fire hoses
CPPFES2020	Conduct routine inspection and testing of fire extinguishers and fire blankets
CPPFES2021	Inspect, test and maintain fire extinguishers
CPPFES2025	Inspect, test and maintain gaseous fire-suppression systems
CPPFES2026	Inspect and test emergency and exit lighting systems
CPPFES2027	Inspect, test and maintain non-gaseous pre-engineered fire-suppression systems
CPPFES2035	Identify, inspect and test fire and smoke doors
CPPFES2037	Inspect and test fire hydrant systems
CPPFES2039	Identify, inspect and test passive fire and smoke containment products and systems
CPPFES2043	Apply regulations to prevent ozone depleting substance and synthetic greenhouse gas emissions
CPPFES2047	Inspect and test control and indicating equipment
CPPFES2048	Receive and dispatch scheduled gaseous fire-extinguishing agents
CPPFES2049	Conduct recovery, reclaim and fill operations for scheduled gaseous fire-extinguishing agents
CPPFES2050	Monitor storage operations for scheduled gaseous fire-extinguishing agents

What are the benefits of taking this course?

- Provides the foundation skills and knowledge required to succeed in the fire protection industry.
- Attain skills to complete routine servicing of fire protection systems and equipment, excluding systems with complex servicing requirements.
- Kick start your journey to becoming a highly skilled and valued employee.
- Completion of the course may satisfy licensing and accreditation requirements across Australia and provide a foundation for future learning.

How long does it take?

- The course is self-paced and typically takes 6-12 months to complete.
- Participants are required to complete the course within 18 months of enrolling.
- Participants undertaking an RPL pathway may complete the course sooner

How is the course delivered?

- The course is delivered in the workplace via a distance-based delivery model and supported by an online learning system.
- Participants are supported throughout the learning process by our industry experts.

How does the course link to Licensing or Accreditation requirements?

- This course will meet licensing and accreditation requirements that have a Certificate II in Fire Protection Inspection and Testing as one of the application requirements.
- Participants may be required to complete additional courses to meet the specific needs of a particular licence or accreditation.
- In some states and territories, a licence or accreditation may be required to undertake fire protection work.
- Visit www.fia.edu.au/advice for information on state and territory requirements or complete our course enquiry form and let us demystify licensing and accreditation requirements and identify your training needs.

Additional training opportunities

On completion of this course, participants may choose to enrol in other courses that cover servicing of other fire protection systems and equipment or select from any of our professional development courses

How do I enrol?

Further information on course fees and enrolment details can be found at www.fia.edu.au/courses

Course outcomes

On successful completion of this course, participants will be awarded **CPP20521 Certificate II in Fire Protection Inspection and Testing**. The course includes the following core units of competency, plus the additional six units selected:

Unit Code	Description
BSBOPS203	Deliver a service to customers
BSBPEF202	Plan and apply time management
CPPCMN2002	Participate in workplace safety arrangements
CPPFES2004	Identify types of installed fire safety equipment and systems
CPPFES2005	Demonstrate first attack firefighting equipment
CPPFES2006	Prepare for installation and service operations
CPPFES2007	Maintain quality of work and promote continuous improvement
